What is HCC’s NetID

Hillsborough Community College has been working towards the goal of a Single Sign on (SSO). The HCC NetID is one step closer to that goal. Up until this point, depending on the system, users were required to have separate logon ID’s and passwords for different systems.

The NetID will minimize that requirement. Using the NetID, users will have, at best, one ID and password to remember to logon to most systems at the college.

https://netid.hccfl.edu/
What systems use NetID?

### Systems that CAN use the NetID
- Faculty/Staff HCC Windows Computers
- My HCC (Blackboard)
- Outlook /(OWA) HCC Email
- SmartThinking
- VPN (Cisco AnyConnect)
- Campus Wireless Access Points
- CampusCruiser (coming soon)
- WebAdvisor (coming soon)

### Systems that CAN NOT use the NetID
- Datatel
- Mac Computers

The systems listed above will are configured to utilize the HCC NetID. There will be very little change from your standpoint on how you utilize these systems. If you know your ID and password to access your email account, then you already know your NetID information.

For assistance with your HCC NetID, please visit our HCC Live knowledge base at [http://hclive.hccfl.edu](http://hclive.hccfl.edu).

Here, you can search for the most current help documents on how to manage your NetID online.
